Wichita Intervention Program

The Wichita Intervention Program is presented to comply with Kansas Law which requires attendance at an alcohol/drug information program and for those whose offense calls for 48 hours incarceration. The Kansas Attorney General has said, "The term "imprisonment" includes not only actual incarceration in jail, but may refer to any situation in which the defendant's liberty is restrained and he or she is subject to additional sanctions should an escape be made". There are no bars on the windows or doors, but nonetheless, this is a jail.

All over America every day people are killed or injured because they or some other person drank too much and then drove their car. It has been said that drunk driving is a violent crime in which everyone is a victim. If you are the driver of a car that kills or injures some innocent person, you will have to live with that on your conscience.

We tend to think that it could not happen to us but it does. In fact every two years more Americans were killed by drunk drivers than were killed in 10 years in Vietnam. Now that is a needless waste of lives. More and more we are saying if you choose to use alcohol or other drugs, that is your business, but when that use places either you or others in danger,

that's our business. We take no position on the use of alcohol, that's a matter of individual choice. We are saying we must change our attitudes on drinking and driving.

Why an alcohol/drug Intervention program?

For years alcohol/drug related offenses were treated just like any other fines, fees, revocations, suspension or restriction of drivers' licenses, and maybe a little jail time. It was found that with some information on alcohol and drugs and what drinking and driving can do to us and to society, the number of repeat offenders was greatly reduced (from 16% - 20% to less than 10% in areas where records were kept).

This is the only school you will ever attend where the stated goal is never to see you again. The school is not punishment. It is an attempt to give you a great deal of information about the use of alcohol and other drugs, the law, the seriousness of the offense, and to change our attitudes about alcohol and drug use, particularly when driving.

Most probably you have some concerns even some anger connected with your arrest, booking, your trial and even the severity of your sentence. We will attempt to address these concerns at this program.

You will be given information which will

allow you to see where you are with your use of alcohol and/or other drugs. If you feel you have a problem and wish to pursue it, we will give you the names and locations of professional people or agencies who can give you more information or treatment.

You can make this an interesting, educational experience and one from which you can benefit. We urge you to ask questions, to participate in the group discussion and to come away feeling you have spent your time and money well.

Testing and client evaluation

At the outset you will be given a test to measure your present level of information on a variety of subjects concerning alcohol/drug impairment, the law and drinking/driving. On Sunday evening, a client evaluation form will be fillout. You will not sign these, but we ask for your honest appraisal of the school, the instructors, the films and suggestions for improving the program.

We hope that you will use the next few days to your benefit, that you will come away with information that will serve you well, and most of all, that you never again suffer the inconvenience, embarrassment, the humiliation, and cost of a DUI offense.
